Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 1-12 and 28-29 the prior art searched and of record neither anticipates nor suggests in the claimed combinations, the original minimum or maximum color value being conceptually moved farther from their original position in the tone reproduction curve when the USCP lies between, respectively, the original minimum or maximum color value and their associated threshold, in order to create a monotonic tone reproduction curve through the original minimum or maximum color value, the USCP, and the conceptual minimum or maximum color value.

Referring to claims 13-27, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, moving outside the range of the original minimum or maximum color values when the user specified control point is between, respectively, either the original minimum or maximum color value and their associated threshold to create a conceptual minimum or maximum color value, and generating a color correction curve using a user specified control point, one of an original minimum or maximum color value, and one of a conceptual minimum or maximum color value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
